Start your review of case studies in immunology, 6th edition (Geha, case studies in immunology: Clinical Companion) The ideal clinical companion for your course of immunology - Thematic research in Immunology 7th edition (PDF) presents the main themes of immunology through a selection of clinical cases that enhance and expand basic science. Each medical history is preceded by important scientific facts about the immunological mechanisms of this particular disorder. The actual cases show how the clinic deconstructs immunological problems, and each of them is followed by a brief summary of the clinical finding with questions that serve as discussion points. E-book, case studies in immunology: Clinical Companion 7th edition of the PDF includes a total of fifty-five cases and can be used as a standalone textbook, a review of care, or as a companion to Janeway Immunobiology, the 9th edition and the immune system of the 4th edition. Six new cases have been added to this edition: activated PI3K delta syndrome, DOCK8 deficiency, LRBA deficiency, increased susceptibility to candida infections, channelopathies and T cell signaling defects. Only registered customers who have purchased this product can leave a review. Case Studies in Immunology, Sixth Edition, presents the main themes of immunology through a selection of clinical cases that enhance and expand fundamental science. The medical history illustrates the main points about the mechanisms of immunity and describes the immunological problems seen in the clinic. This new edition illustrates the importance of understanding immunology in diagnosis and therapy. Case studies in immunology highlight major common immune disorders, including hypersensitivity of I-IV types, immunodeficiency, and autoimmune disorders. Each medical history is preceded by the fundamental scientific facts needed to understand the immunology behind specific disorders. In each case, a summary, questions and discussion points are completed. Case studies in immunology can be used as an independent book, or as a clinical companion along with Janeway Immunobiology, the Eighth edition. A marginal icon in Janeway's immunobiology provides the reader with a reference to a relevant study where science is applied in clinical settings. The book includes a total of 53 cases. The sixth edition is widely revised and updated and includes ten new cases: DiGeorge Hemophagocytic lymphohistiocytosis Chediak-Higashi Syndrome Hyper IgE Syndrome Ataxia Telangiectasia Warts, Hypogammaglobulinemia, Infections, and Myelokathexis (WHIM) case studies in immunology 6th edition pdf free. case studies in immunology a clinical companion 6th edition pdf
